REMARQUES sur le DÉCODEUR:

- La première adresse doit impérativement être programmée.
- Ne pas programmer plusieurs sorties avec la même adresse.

HINWEISE zum DECODER:

- Die erste Adresse muss programmiert werden.
- Nicht mehrere Ausgänge mit derselben Adresse programmieren.

Il y a plusieurs façons de le connecter / Es gibt mehrere Schaltmöglichkeiten:

Diagram 1 (Top): Shows the decoder connected to an amplifier kit. The decoder's BUS terminal is connected to the amplifier's EXT terminal. The decoder's PGM terminal is connected to the amplifier's INT terminal. The decoder's output lines are connected to various devices: D1 and D2 to a doorbell, C2, C3, A, P, and Z to other devices. The decoder is connected to the central unit or the previous decoder via Ref. 5918.

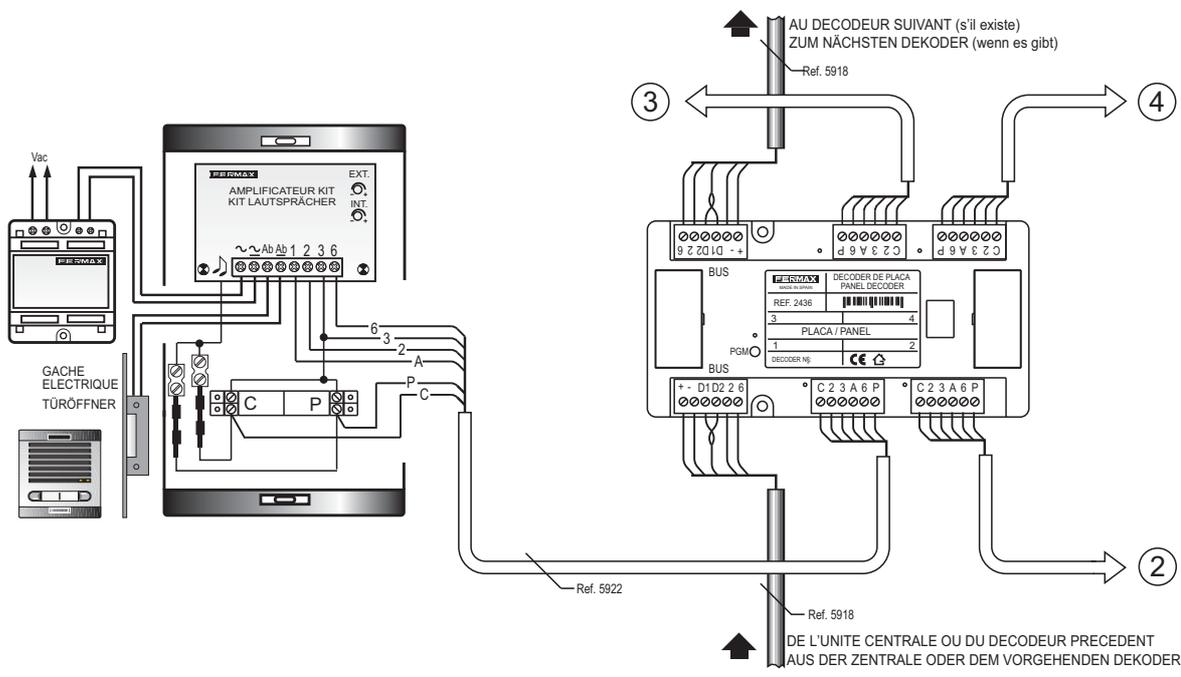

Diagram 2 (Middle): Shows the decoder connected to an amplifier kit and an electric door lock. The decoder's BUS terminal is connected to the amplifier's EXT terminal. The decoder's PGM terminal is connected to the amplifier's INT terminal. The decoder's output lines are connected to various devices: D1 and D2 to a doorbell, C2, C3, A, P, and Z to other devices. The decoder is connected to the central unit or the previous decoder via Ref. 5918.

Diagram 3 (Bottom): Shows the decoder connected to an amplifier kit and an electric door lock. The decoder's BUS terminal is connected to the amplifier's EXT terminal. The decoder's PGM terminal is connected to the amplifier's INT terminal. The decoder's output lines are connected to various devices: D1 and D2 to a doorbell, C2, C3, A, P, and Z to other devices. The decoder is connected to the central unit or the previous decoder via Ref. 5918.
